

Rushikesh Satwadhar

DevOps Engineer

✉️ rushisatwadhar23@gmail.com | ☎️ +91 9561159005 | LinkedIn | GitHub | 📍 Pune

PROFILE

DevOps Engineer with **2 years of professional experience** in enterprise network engineering and hands-on experience with **AWS, Terraform, Ansible, Docker, Kubernetes, Jenkins, Git, Linux, CI/CD, and Infrastructure as Code (IaC)**. Skilled in automating infrastructure, containerization, orchestration, and cloud deployments. Strong networking fundamentals and committed to building secure, scalable, and highly available cloud-native applications. **Immediate Joiner.**

TECHNICAL SKILLS

- **Cloud & DevOps:** AWS (EC2, VPC, EKS, ECR, S3), Docker, Kubernetes, Terraform, Ansible, Jenkins
- **CI/CD & Monitoring:** Git, GitHub Actions, Prometheus, Grafana, SonarQube, Linux (Ubuntu), Python, Bash
- **Networking:** TCP/IP, DNS, HTTP/HTTPS, Load Balancing, Subnets, Security Groups

WORK EXPERIENCE

Tata Communications Transformation Services (TCTS)

Network Engineer | Aug 2023 – Aug 2025

- Configured and troubleshoot Cisco routers and switches, ensuring high network availability.
- Monitored network performance using HPE IMC and resolved issues proactively.
- Managed network incidents through ServiceNow, ensuring SLA compliance.
- Diagnosed and resolved TCP/IP, DNS, DHCP, and LAN/WAN connectivity issues.
- Collaborated with cross-functional teams to perform Root Cause Analysis (RCA) and restore services efficiently.

PERSONAL PROJECTS

Netflix Clone – End-to-End DevOps CI/CD Pipeline

🔗 [GitHub Repository](#)

Tech Stack: Git, GitHub, Jenkins, Docker, Maven, Apache Tomcat, AWS EC2, Prometheus, Grafana

- Built a **Dockerized** CI/CD Pipeline using **GitHub, Jenkins, Docker, and Maven**.
- Integrated **GitHub Webhooks** to trigger automated builds on every code push.
- Deployed the application to **Apache Tomcat** on **AWS EC2**.
- Implemented **monitoring** using **Prometheus** and **Grafana**.
- Demonstrated an end-to-end **DevOps workflow** from code commit to automated deployment.

AWS Infrastructure Automation with Terraform & Ansible

🔗 [GitHub Repository](#)

Tech Stack: AWS EC2, VPC, Terraform, Ansible, Linux, Nginx, Bash

- Provisioned AWS infrastructure using **Terraform (Infrastructure as Code - IaC)**.
- Automated server configuration using **Ansible**, including **Nginx** installation and setup.
- Deployed environment-specific applications across **Development, POD, and Staging** environments.
- Implemented a **multi-environment deployment strategy** using **AWS, Terraform, and Ansible**.
- Demonstrated end-to-end **Infrastructure Provisioning** and **Configuration Management**.

EDUCATION

Bachelor of Engineering (Computer Science & Engineering)

Marathwada Institute of Technology Engineering College, Aurangabad

CGPA: 7.28 | 2021

CERTIFICATIONS

- **AWS Cloud Practitioner Essentials**
- **AWS Knowledge: Cloud Essentials – Training Badge**
- **Team Excellence Award**
